ABOUT

I am a final-year student at GIFT University, Gujranwala, pursuing a bachelor's degree in software engineering. My intermediate studies in FSC-Pre Engineering and Matriculation in Biology Science have given me a solid foundation in both technical and scientific subjects. I am passionate about learning new computer science topics and want to combine academic knowledge with real-world application. I've also developed a talent for instructing matriculation students in science courses, hoping to transfer both academic and practical understanding. My desire to contribute successfully in professional and academic contexts, where I can share my knowledge and learn more, is fueled by my diversified experience.

CAREER OBJECTIVES

My goal is to build my own IT company in the computer science sector and use my technical knowledge and teaching experience to transfer into entrepreneurship. With an eye toward powerful goods that address the demands of the growing market, I plan to concentrate on creative solutions that complement my abilities in personalized learning and critical thinking. As I promote a culture of ongoing growth and creativity, I hope to propel technological advancements.

WORK EXPERIENCE

TEACHING AT HOME

2020 - 2022

I taught matriculation and intermediate students at home, providing personalized instruction that built strong foundational knowledge and critical thinking skills. My tailored approach helped students excel academically, enhancing their confidence and readiness for higher education.

PREFERRED SUBJECTS

Computer Science (Matriculation)

Mathematics (Matriculation)
